Don't take our word for it, here's some testimonials from happy mango users...

“

Straight away I thought the mango app was really useful, I have my phone out all the time so no longer needed to get my purse out of my bag to get my mango card out.

With the app I can check my balance and journeys any time I want to. It was really easy to understand how to use. I'm very happy with the app and wouldn't go back to the card.”

“

The app was pretty good right from the start. *It's great seeing the daily or weekly caps get hit because then you can travel for no extra charge.*

A lot of times I have left my mango card in a coat pocket or forgotten to take my wallet, so the mango app is better as I always know I'll have my phone with me.
