

Hospital Options

Hospital Options

With Aviva it's reassuring to know that you'll have access to the medical care you need when you need it most.

This booklet details the various hospital options available that offer a comprehensive range of treatments. At Aviva we have two routes to hospital treatment – Aviva Quality Guiding and Aviva Hospital Lists. If you refer to your policy documents, they will tell you whether you have Expert Select, Optimum Referral or one of our Hospital List options.

Expert Select and Optimum Referral

If you have one of our **Quality Guiding** hospital options (Expert Select or Optimum Referral), it couldn't be easier. Just ask your GP for an open referral (one that specifies the type of specialist or specialism you need, but not a named specialist), and then call the customer service helpline. Our claims experts will provide you with a choice of local hospitals/facilities and specialists that you can use, and can book your first appointment for you there and then.

Hospital Lists – Extended List, Key List, Trust List, Signature List, Fair & Square List, Speedy Diagnostics List.

If you have a **Hospital List** option, you should always telephone our customer service helpline prior to receiving any treatment to confirm that the hospital you've selected is recognised by us to provide the type of treatment you require and for the condition that requires treatment. Hospitals available on your hospital list are colour coded on the Hospital List Summary, below.

Please check your policy documentation to see the hospital list that applies to your policy.

Please be aware that out-patient CT, MRI and PET scans will only be covered at a diagnostic centre approved by Aviva. Please call customer service helpline to check which diagnostic centres are Aviva approved before having these investigations.

Quality Guiding Options – Expert Select & Optimum Referral

Expert Select and **Optimum Referral** are our two Quality Guiding hospital options. Expert Select is available for individual customers and companies of 1-249 employees. Optimum Referral is available to companies with 250 employees or more. When you have one of our Quality Guiding options, there's no Hospital List. We provide you with a choice of quality assured hospitals (4-5 hospitals UK avg.), local to you (within 25 miles), when you need medical care. Hospital choices available to you will depend on your personal diagnostic or treatment needs at the time you make a claim, so the facilities available to you will vary. All major private hospital groups are included on Expert Select and Optimum Referral.

Quality Guiding provides simpler access to treatment and the support of our expertise to guide you to quality assured hospitals and facilities in your area. On Expert Select and Optimum Referral, we prioritise those hospitals who meet specific quality standards and who strive to improve customer and patient experience.

If you have Expert Select or Optimum Referral, we will apply our quality guiding to both your out-patient and inpatient care.

If you are a customer with Expert Select or Optimum Referral, the Hospital List Summary in this document does not apply.

Networks

Networks provide even greater quality assurance – quality guiding for specific condition types. Using clinically selected Networks we can guide you to facilities who, not only meet our expected quality standards, but who specialise in providing expert care for specific condition types. If you have one of our Quality Guiding hospital options, you will automatically be guided to, and benefit from our Networks. Other policy members can also benefit from our Networks – just ask our claims experts when you call the customer service helpline. If you have an Optimum policy, please see your policy documents to see how Networks apply to you.

To help drive consistent quality of care, we're developing a number of networks of facilities, specialists, and other practitioners for specific conditions. We adopt a 'Value Based Healthcare' approach to ensure that we select providers with high clinical quality, delivering excellent customer experience and at sustainable commercial rates. Your member documentation will detail how networks apply to you. A list of the conditions or suspected conditions for which we have networks in place can be found at aviva.co.uk/health-network

Hospital List Options

Key Hospital List

This list indicates the private and NHS hospitals most frequently used by people with medical insurance. Many of the NHS hospitals listed have dedicated private patient units. Please check the facilities that will be made available to you. In addition to the hospitals shown on this list, your policy also gives you access to some NHS pay-beds recognised by us. Altogether this will give you access to around 800 hospitals countrywide.

Extended Hospital List

This increases the number of hospitals you have access to, predominantly in the Greater London area.

Fair+Square Hospital List

A network of hospitals from some of the largest private hospital providers in the country.

Trust Hospital List

The hospitals listed offer dedicated private patient units with comfortable accommodation, normally including a single room with en suite bathroom facilities.

Trust Approved Hospitals are sometimes single-specialty hospitals. For example they may offer only cancer treatment or only cardiology. If you choose the Trust list, please check to ensure that as well as there being a hospital within 30 miles of your address, it is one which will be able to offer treatment for a range of conditions.

S indicates those hospitals on the Trust List of Approved Hospitals which are single specialty hospitals.

In addition to the hospitals on the Trust List you can also use any other NHS hospital agreed in advance with us for in-patient and day-patient treatment. However, please note that these hospitals may not have dedicated private patient facilities, and may not be able to offer single or en suite accommodation, prompt admission or direct settlement of accounts. It's recommended that you confirm with your specialist prior to admission what standard of facilities are likely to be available to you at non-listed NHS hospitals.

Out-patient Treatment

If you require out-patient consultations, tests or treatment covered by the policy, and they're not available at a Trust hospital, you are not restricted by the Trust List and may use any private hospital or consulting room agreed with our customer service team. This does not apply to CT, MRI or PET scans which are only covered at a diagnostic centre.

Signature Hospital List

This list is available for customers living in Scotland or Northern Ireland.

In addition to these hospitals you are also covered to use NHS pay-beds that are recognised by us in Scotland or Northern Ireland.

If you have in-patient or day-patient treatment at any other hospital recognised by us, we'll calculate the average cost of equivalent treatment across all hospitals on your list, and that average cost is the maximum we'll pay. This could leave you with a shortfall that the policy doesn't cover. If the actual cost of the treatment is less than the average cost, we'll pay the hospital costs in full.

If you receive treatment in a hospital that isn't recognised by us, we won't pay any hospital fees for your treatment.

Children

Not all of the private hospitals listed are able to admit children for private treatment, although some NHS hospitals are able to do so. Please contact us if you've any queries about cover for your children on your policy.

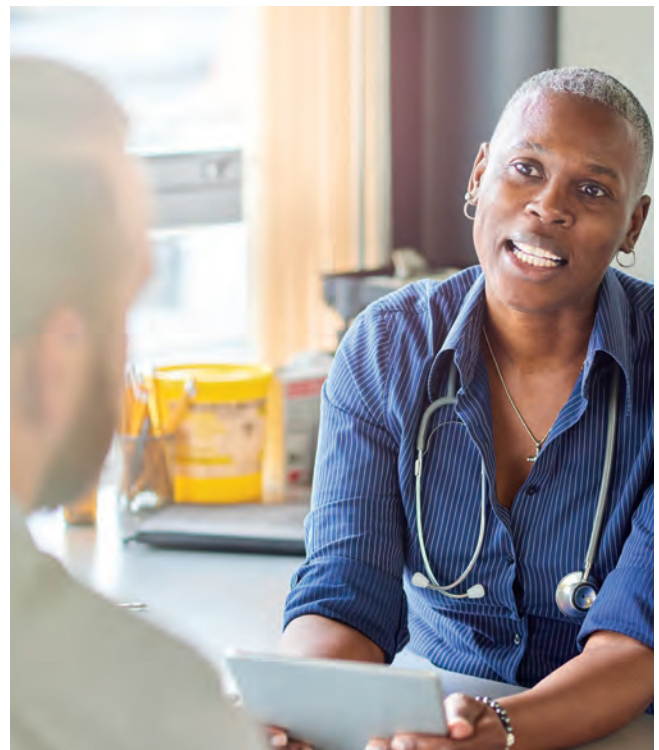

Call us

You should always telephone us prior to making a claim providing details of your policy number, symptoms or condition so that we can check that the treatment and costs will be covered under your healthcare policy.

Sound Advice

We strongly recommend that you refer to this list and your terms and conditions before going to see your GP. If they need to refer you to a specialist, call us so we can confirm whether we recognise that specialist for the treatment that you require.

If you have an open referral, with no specialist name, we can help to name the specialists in your area that work out of a hospital on your list. This sometimes means you can get an appointment quicker, as you can arrange an appointment with the specialist that can see you at a time that suits you.
